

Online Speech Therapy for BC Kids

**TRUE NORTH
SPEECH**

We believe that quality speech therapy should be available to all British Columbians, especially developing children.

However, many children live in rural areas and don't have easy access to a traditional speech-language pathologist's office. At True North Speech, our goal is to bridge this gap by offering quality speech therapy via the internet.

We specialize in providing treatment to children (ages 4–19) with:

- articulation disorders
- autism
- motor planning difficulties
- lisps
- language delays
- learning disabilities
- processing difficulties
- other communication disorders

To accommodate our clients, we:

- offer a free 15 minute phone consultation
- offer financial aid guidance
- accept Autism Funding
- offer sessions available 7am–5pm

All you need is:

- a desktop or laptop
- a webcam
- an internet connection
